

## TechNotes

ISSUE 2005:2

**TechNotes**, a technical newsletter from the Mursix Corporation, is published and e-mailed approximately 4-5 times per year. In each issue, we address specific technical issues, answer technical questions, and communicate useful information about new equipment, processes, services and the ever-expanding capabilities of Twoson Tool, Twoson ESP, Dakota Engineering, TFX Plating, Chintec Precision Manufacturing, and Tri-T Technologies Import/Export.

This issue of **TechNotes** covers the opening of our new manufacturing facility in Wuxi, China – Chintec Precision Manufacturing.

## Mursix Expands Operations With New Plant in Wuxi, China

The companies that make up the Mursix Corporation have been delivering value-added product solutions to customers since 1945. Now, Mursix is positioned to extend that sixty-year record of customer service and manufacturing excellence well into the 21st century – and beyond.

As part of that continuing effort, we have established Chintec Precision Manufacturing in Wuxi, China. This operation, which was literally built “from the ground up”, contains all of the same capabilities that we have developed in our U.S. plants over many years, including punch press and multislide stamping, insert molding, CNC and screw machining, assembly, and many others. Chintec is fully staffed with engineering and quality personnel, and these functions utilize the corporate-wide Mursix engineering document control system.

The plant, strategically located in a “high technology zone” in Wuxi, Jiangsu Province, also serves as local headquarters for Mursix’s own import/export company, Tri-T Technologies Import/Export LLC. Tri-T not only handles the shipping of products manufactured by Chintec, it is our sourcing base for a wide range of cost-effective tooling, raw materials, engineering services, and technologies throughout Asia.

By having its own import/export operation, Mursix can truly be a “one-stop” source for its customers’ global tooling, material, and finished product requirements. We handle all customs, inspection, licensing and freight arrangements, with shipping available in either full or partial containers, depending on customer requirements. This additional Mursix capability allows our customers to treat importing as if it were a domestic transaction. According to Mursix President Todd Murray, “Tri-T has allowed us to respond to the tremendous demand for sourcing cost-effective tooling in Asia, for our existing customers and for new customers.”

The next issue of TechNotes will provide additional information about the sourcing capabilities of Tri-T Technologies Import/Export, as well as additional details about the capabilities of Chintec Precision Manufacturing.

Our new Asian manufacturing operations and our import/export company join the growing list of Mursix Corporation divisions and affiliates:

- Twoson Tool Company – Muncie, Indiana
- Twoson ESP – Matthews, Indiana
- Dakota Engineering – Indianapolis, Indiana
- TFX Plating – Muncie, Indiana
- Chintec Precision Manufacturing – Wuxi, China
- Tri-T Technologies Import/Export – Muncie, Indiana/Wuxi, China

Each of these Mursix companies can avail itself of the corporation’s expertise and its overseas sourcing capabilities for a variety of low-cost, value-added services. Mursix can combine the capabilities of its divisions and affiliates to produce value-added product solutions for its customers in the U.S. or around the world.

Twoson Tool, Twoson ESP, TFX Plating, Dakota Engineering, Chintec Precision Mfg., and Tri-T Technologies Import/Export comprise the Mursix Corporation, an integrated, multi-disciplinary enterprise serving the appliance, automotive, medical, marine, and other industries. Our capabilities include tool design and construction, punch press and multislide stamping of precious metals, CNC and screw machining, in-machine processing, sophisticated multi-part assembly, and silver, tin, & zinc post plating.

*Our Chintec plant is strategically located in a “high technology zone” in Wuxi, China.*

*Our Wuxi facility contains all of the same capabilities that we have developed in our U.S. plants.*

*Chintec manufacturing personnel utilize the corporate-wide Mursix engineering document control system.*

*Our Tri-T Technologies Import/Export operation can source and import an almost endless range of tooling, raw materials, and manufactured goods.*
